this in depth casebook takes mental disorders from the realm of theory into the complex reality of human lives covering the full range of psychopathologies and types of patients these cases focus on symptoms the client's history treatment and outcome to provide detailed descriptions of a wide range of clinical problems

explore the impact of psychological disorders on real lives with this fascinating collection of case studies

using a case oriented approach this practical text provides evidence based guidance related to the evaluation and management of persons with balance and vestibular disorders the text benefits by the combined expertise of a neurologist a neurotological surgeon and a physical therapist

case studies in abnormal psychology takes mental disorders from the realm of theory into the complex reality of human lives

in the recent literature the most influential case study books in neuropsychology are in the adult realm pediatric neuropsychology is a rapidly developing field with increasingly greater influence in the assessment diagnosis early identification and treatment of childhood illnesses this book will provide the first centralized comprehensive resource for case studies in pediatric neuropsychology not only will this supply a valuable compilation for the growing numbers of professionals in this field but will also serve as an

innovative and appealing resource for therapists teachers and others interested in child development this book will be structured in such a way that readers can easily access individual cases of interest as well as related areas of dysfunction section breakdowns will be provided in order to highlight the combined focus of case presentations in acquired neuropsychological dysfunction as well as developmental disorders each section will begin with an introductory chapter highlighting the salient feature of the concept and providing brief up to date reviews of the current research and theories within each global section individual case studies will serve as stand alone chapters contributing authors will be provided extensive guidance and coaching with regards to the standard format and information to be included in each chapter the first section of this book will present cases involving neurological disorders the intention of this section is to provide not only classic examples of neurological dysfunction in children but also to provide interesting cases of unique or remarkable presentations the second section will present an accumulation of cases representing both common and progressive conceptualizations of developmental disabilities section three has been designed to highlight cases which often present complex issues to neuropsychologists the case examples in this section will highlight the use of alternative treatments pathologies that are often a source of inquiry and situations that lack the more rigorous scientific data often utilized in other diagnostic procedures additionally this section may include chapters on common differential diagnosis dilemmas in clinical practice often multifaceted and even contradictory evidence can arise during evaluations resulting in complex or problematic situations for the clinician such examples are difficult by their nature to forecast but rather would be added during the book s development as they occur

get much needed exposure to real world clinical scenarios and psychiatric evaluations with this invaluable guide to positive effective psychiatric advance practice nursing care for an expert guide to providing patient centered evidence based psychiatric care keep psychiatric case studies for advanced practice by your side practical and easy to follow these more than 50 case scenarios clearly display the complaints diagnoses and treatments of the most common psychiatric disorders supporting the critical decision making

skills of nurses practicing in a broad range of settings psychiatric family emergency and general practice nurse practitioners of all experience levels will find this an invaluable aid for creating an informed holistic practice follow the real life cases and expert analysis of psychiatric patients of a wide variety of ages backgrounds and conditions real world child adolescent adult and geriatric inpatient and outpatient psychiatric case studies that emphasize problem based learning and an evidence based practice current diagnostic content from the diagnostic and statistical manual of mental disorders 5th edition dsm 5 that includes dsm 5 s newer diagnoses gender dysphoria binge eating disorder and autism spectrum plus current treatments for alcohol and opiate addiction sample routine screening tools that offer convenient checklists and handouts to support patient treatment content presented in a simple format organized by age and indexed by diagnostic category for quick reference each case presented in a standard format chief complaint history mental status diagnosis differential diagnosis treatment plan and rationale for treatment prescribed with questions at the end that guide you to create a diagnosis using the dsm 5 cases addressing a wide range of disorders and supporting all experience levels in a variety of treatment settings counseling centers correctional facilities homeless shelters inpatient psychiatric units and hospital consultation and liaison services treatments and rationales that represent current evidence based research treatment sections divided into psychopharmacology diagnostic tests referral psychotherapy and psychoeducation supplemental teaching tool for graduate psychiatric nurse practitioner apn programs

the human mind is both extraordinary and compelling from the leader who convinced his followers to kill themselves to the man who lost his memory these famous accounts have provided invaluable insights for scholars and researchers and amazed the public at large brought to life by rolls each case is contextualized with more typical behaviour while the latest thinking in each subfield is also discussed revised and updated this new edition features two new case studies including the jim twins by thomas bouchard an amazing case of twins separated at birth and adopted by different parents yet when reunited 30 years later shared so many behavioural characteristics it also features a new issues and debates chapter classic case studies in psychology is accessibly

written and requires no prior knowledge of psychology just an interest in the human condition the book will amaze sometimes disturb but above all enlighten its readers geoff rolls has taught psychology for over 26 years and is currently head of psychology at peter symonds college winchester uk he is the author of the popular women can t park men can t pack chambers 2009 which investigates gender stereotypes including driving and also taking the proverbial chambers 2007 which explores the psychological truth behind well known proverbs and sayings

case studies in abnormal psychology presents actual clinical cases providing developmental histories essential to appropriate diagnosis and treatment of mental disorders this text presents 23 distinct case studies applying abstract theoretical research to real world situations each study describes the clinical problem demonstrates the formulation and implementation of a treatment plan and discusses evidence of potential causes and prevalence this comprehensive examination includes cases ranging from psychotic and personality disorders including schizophrenia and bipolar disorder to those concerning child development and aging such as attention deficit and hyperactivity disorder coverage of sometimes controversial subjects including dissociative identity disorder gender dysphoria autism spectrum disorder and posttraumatic stress disorder ensures contemporary relevance suitable for undergraduate and graduate study of abnormal psychology this book presents an honest and unbiased view of the limitations and benefits of various treatment plans discussions of alternative methods including medication electroconvulsive therapy and psychosurgery augment primary cognitive behavioral approaches allowing students a solid foundational knowledge of the subject

a unique case study book adult psychopathology case studies presents adult client case studies that describe the ways in which people with psychological disorders are likely to think feel and act written by experienced clinicians and well known authorities in their respective specialties it brings together the work of an international group of contributors who address the nature origin development manifestations course and prognosis of a diverse range of adult psychopathological conditions close examination is

given to the clinical personal contextual theoretical ethical and legal dimensions of case studies along with insightful real world focus on overlapping themes such as culture substance abuse domestic violence and sexual abuse authors illustrate rational case formulation but stop short of exhaustive or doctrinaire analyses that would discourage alternative opinions on how and why a disturbance occurred or its likely outcome giving students an opportunity to apply their own knowledge to each case and providing instructors with material that will spark lively classroom discussion and debate the contributors also bring a broad range of theoretical perspectives to the diverse array of case studies including psychoanalytic psychodynamic interpersonal cognitive and cognitive behavioral conceptualizations of psychopathology and psychotherapeutic methods adult psychopathology case studies includes thirteen full length case studies in the following categories personality disorders anxiety and somatoform disorders identity disorders habit disorders serious or psychotic disorders also included are six brief case studies covering adjustment disorder dependent personality disorder schizotypal personality disorder generalized anxiety disorder polysubstance dependence depressive disorder adult psychopathology case studies offers an engaging and perceptive look into the real world of adult psychopathology and provides students with an enriching hands on learning experience as they apply their knowledge and techniques to each of the unique case studies provided in this book

this is a collection of 48 highly useful case studies of children and adults with communication disorders

vestibular disorders second edition uses a case study approach to outline the principles and practice of the care of patients with dizziness and balance disorders the text reflects the combined perspectives and experience of a neurologist dr furman and a neurotologic surgeon dr cass each case study contains relevant material regarding history physical examination laboratory testing differential diagnosis and treatment this material provides a springboard for discussion of either a concept in the field of vestibular disorders or the diagnosis or treatment of a particular disease state practical specific treatment options are discussed throughout

the book for this the second edition each of the cases from the first edition has been updated the background material has been reorganized and 14 new cases have been added five of which concern patients with multiple diagnoses a new part of the book entitled controversial case studies includes ten cases that address a disorder or clinical issue surrounded by a particularly broad range of opinion or uncertainty vestibular disorders second edition aims to span the gap between existing in depth texts and the problems that arise whenever a patient presents with dizziness

the third edition of case studies in child and adolescent psychopathology provides engaging narratives of clients with complex family situations the answers to important real world questions are often nuanced contextual and tentative unlike the idealistic scenarios presented in most textbooks these case studies contain ethical lapses clinical mistakes confusing diagnostic pictures cultural misunderstandings unevenly applied evidence based approaches and sometimes unhappy endings the fictional but realistic portrayals of clients help students learn the skills needed to be successful in the mental health field critical thinking questions designed to develop objective analysis and evaluation abilities are embedded throughout the cases these questions can become individual or group assignments for in person hybrid and online formats the problem based learning approach challenges readers to create accurate case conceptualizations and evidence based treatment plans the cases utilize the international classification of diseases and the diagnostic and statistical manual of mental disorders the current research applied in the cases deepens understanding of the etiology and treatment of these disorders and captures the tremendous progress in the field of psychology in establishing evidence based treatment continuing the book s tradition of diversity the third edition includes a paraplegic father a blind psychologist asian american black biracial muslim latinx and native american participants with differing socioeconomic circumstances immigration statuses and sexual orientations

the key aims of this text are to illustrate the use of various types of mental health treatments and to provide in depth examples of

common psychological disorders supported by case studies the 34 journal articles in this book authored by practicing psychotherapists psychiatrists psychoanalysts and counselors describe the treatment of individual clients in most cases the authors discuss a client s psychological problem the treatment used w ith the client and the outcome this book is designed for use in courses in clinical counseling and abnormal psychology each article is followed by 1 a list of psychological term s for classroom discussion and 2 questions that call for students opinions on various aspects of die case

the case studies bring to life the process of differential diagnosis and illustrate how important this process can be for treatment planning this casebook follows the organizational pattern of dsm iv tr and provides examples of the most commonly encountered disorders

highly regarded for its clinically relevant and thought provoking content winningham s critical thinking cases in nursing 6th edition features 150 case studies that cover all four clinical practice areas medical surgical pediatric ob maternity and psychiatric nursing each case covers a common patient problem drawn from actual clinical experiences and written by nurses who are clinical experts this edition reflects the most current standards of clinical practice including content on pharmacology nutrition and diagnostic laboratory tests to prepare you for all aspects of patient care from nursing educators mariann harding and julie snyder this workbook helps you develop your clinical nursing judgment and bridge the gap from nursing knowledge to nursing practice comprehensive case study approach uses cases drawn from actual clinical experiences to help you identify changes anticipate possible complications and initiate therapeutic interventions progressive case complexity builds on previous learning and helps you develop more and more expertise 150 case studies cover all major clinical areas including medical surgical pediatric ob maternity and psychiatric cases providing you with many diverse clinical situations and opportunities to apply knowledge and develop critical thinking skills body system organization makes the book easier to use with medical surgical nursing textbooks and courses new

qsen icons highlight essential safety content new increased emphasis on nclex exam style alternate format questions includes multiple response prioritization and illustration based questions offering better nclex examination preparation new additional documentation questions and a new chart view design provide more experience in documenting patient care based on real world electronic chart formats new reorganized format presents cases in three parts 1 medical surgical cases 2 pediatric maternity and women s health cases and 3 psychiatric and alternative therapies cases new increased difficulty level includes more questions about care of older adults and multi system situations updated content includes the latest clinical treatment guidelines issues and practice standards

the humanities in higher education are too often labeled as impractical and are not usually valued in today s marketplace yet in professional fields such as the health sciences interest in what the humanities can offer has increased advocates claim the humanities offer health care professionals greater insight into how to work with those who need their help illness and image introduces undergraduates and professionals to the medical humanities using a series of case studies beginning with debates about male circumcision from the ancient world to the present to the meanings of authenticity in the face transplantation arena the case studies address the interpretation of mental illness as a disability and the new category of mental illness self harm sander l gilman shows how medicine projects such categories existence into the historical past to show that they are not bound in time and space and therefore are real illness and image provides students and researchers with models and possible questions regarding categories often assumed to be either trans historical or objective making it useful as a textbook

this rich collection of case studies including real contemporary and classic cases illustrates a wide range of clinical and legal issues related to abnormal psychology case studies in abnormal psychology brings the field of abnormal psychology to life for readers with its rare combination of readability humor and strong scholarship readers gain a greater sense of what the person experiences and

how he or she reacts to the diverse factors studied in psychopathology as they apply principles of abnormal psychology to these cases to more fully understand the nature of the disorder each case in this book contains the full background material relevant to etiological diagnostic and therapeutic considerations also significant family and social history data are presented to give a clear picture of how specific behavior patterns were generated and maintained for anyone interested in clinical and legal issues in psychology
